About me

Matti is active and curious software engineer with wide variety of experience from the field of IT.

Skills

Social*6 Teamwork*6 Adaptive*5
Humor*6 Creativity*5

(*)[The skill scale is from 0 (Fundamental Awareness) to 6 (Expert).]

Experience

- 2019- Software expert** Samlink Oy
Software development projects in banking industry, as well as DNA Entertainment platform and Web UI development.
 Java, Android, Node.js, Angular, Typescript
Also legacy service maintenance related to power grid failure messaging and Chamber of Commerce document handling.
 Bash, Apache, ANT, PSQL, Glassfish, Wildfly, Liferay, Alfresco
- 2017-2018 Junior Developer** Innotect Oy
Microsoft Azure based software development and electronic device designing/programming.
 Azure Function Apps (C#), BlinkStick (Python, C#), Legato (C), IoT
- 2015-2016 Trainee** ABB Oy
Low Power AC frequency converter product management team. Competitor comparison and analysis, database management, etc.
- 2014 Trainee** ABB Oy
Frequency converter ACS800 assembling.
- 2013 HMI Designer** Elmont Oy
Interface and UI designing of an order management software for factory production line.
 C#, SQL

Education

- 2015-2022 M.Sc. Automation and Control Engineering** Aalto University
Major: Control, robotics and autonomous systems spiced with Computer, Communication and Information Science
Minor: Software engineering
Thesis: *Machine learning approach to support ticket forecasting from software logs*
- 2011-2015 B.Sc. Automation and Systems Technology** Aalto University
Minor: Software engineering.
Thesis: *Offline-programming of industrial robots*
- 2009 Highs school** Lahden Yhteiskoulu
Matriculation examination

OS

Windows - native
Ubuntu - excellent
Ubuntu CLI - professional

Languages

Finnish - native
English - excellent
Swedish - intermediate

Other information

Professionally speaking

I'm interested in full-stack development, cloud technologies, machine learning and customer sales representing. I've always loved working with people and solving real problems with the knowledge I have. Be it with the team on projects, with colleagues on internal processes, or with customer on their needs, I thrive in situations where the first step is to understand the actual issue and solve it with the best possible way.

Hobbies and such

I like challenging myself with different sports. Most regularly I practice parkour and gymnastics, but I also love snowboarding and water sports. Besides sports, I like to play computer and console games, tinker with electronics and microcontrollers, and build useful gadgets and ornaments from scrap parts.

“Thrust the process!”
